About PolyEurope

PolyEurope bv is located in the heart of The Netherlands. Founded in 1974, the company has become Europe's full line leading company in the manufacture, design and supply of high-performance pipeline cleaning and testing pigs to the oil, gas and municipal industry. Its management team has more than a century's combined experience in the pigging and pipeline industry. With production, storage facilities, a research & development centre in the Netherlands and quality accreditation to BS EN ISO 9001:2015, PolyEurope bv is well placed to make a significant impact on the oil and gas market worldwide.

Facilities

PolyEurope bv operates from modern units' production space and is capable of carrying out all its manufacturing operations in-house. The polyurethane and foam casting departments house a high specification high pressure foam dispensing machine and polyurethane low pressure dispensing machines capable of multi additive injection. This allows for the elastomeric system to be tailored as required. To meet client's requirements all processes are fully computerized and monitored. Alongside these highly specialized machines, we also have computerized air filtration systems that both clean and monitor the atmosphere in the working environment ensuring that we are working to the highest health and safety standards possible. All polyurethanes used for the manufacture of the polyurethane components are designed in house and batch wise quality checked by our chemists with the latest testing equipment, assuring our clients highest quality without defects. The workshop is equipped with its welding and fabrication bay, laser cutter, drilling, turning and vertical borer facilities. This includes CNC lathe, paint spraying and grit blasting booth. The pressure testing bay has the facility to hydrostatically test components up to 1000 barg (1450 psi).

Product Summary

PRE COMMISSIONING

OPERATIONAL PIGGING

PRE IN-LINE INSPECTION

DECOMMISSIONING

Standard Bidirectional Pigs

Scraper Cup Pigs

Conical Cup Pigs

Flexible Pigs

Dual Module Pigs

Foam Pigs

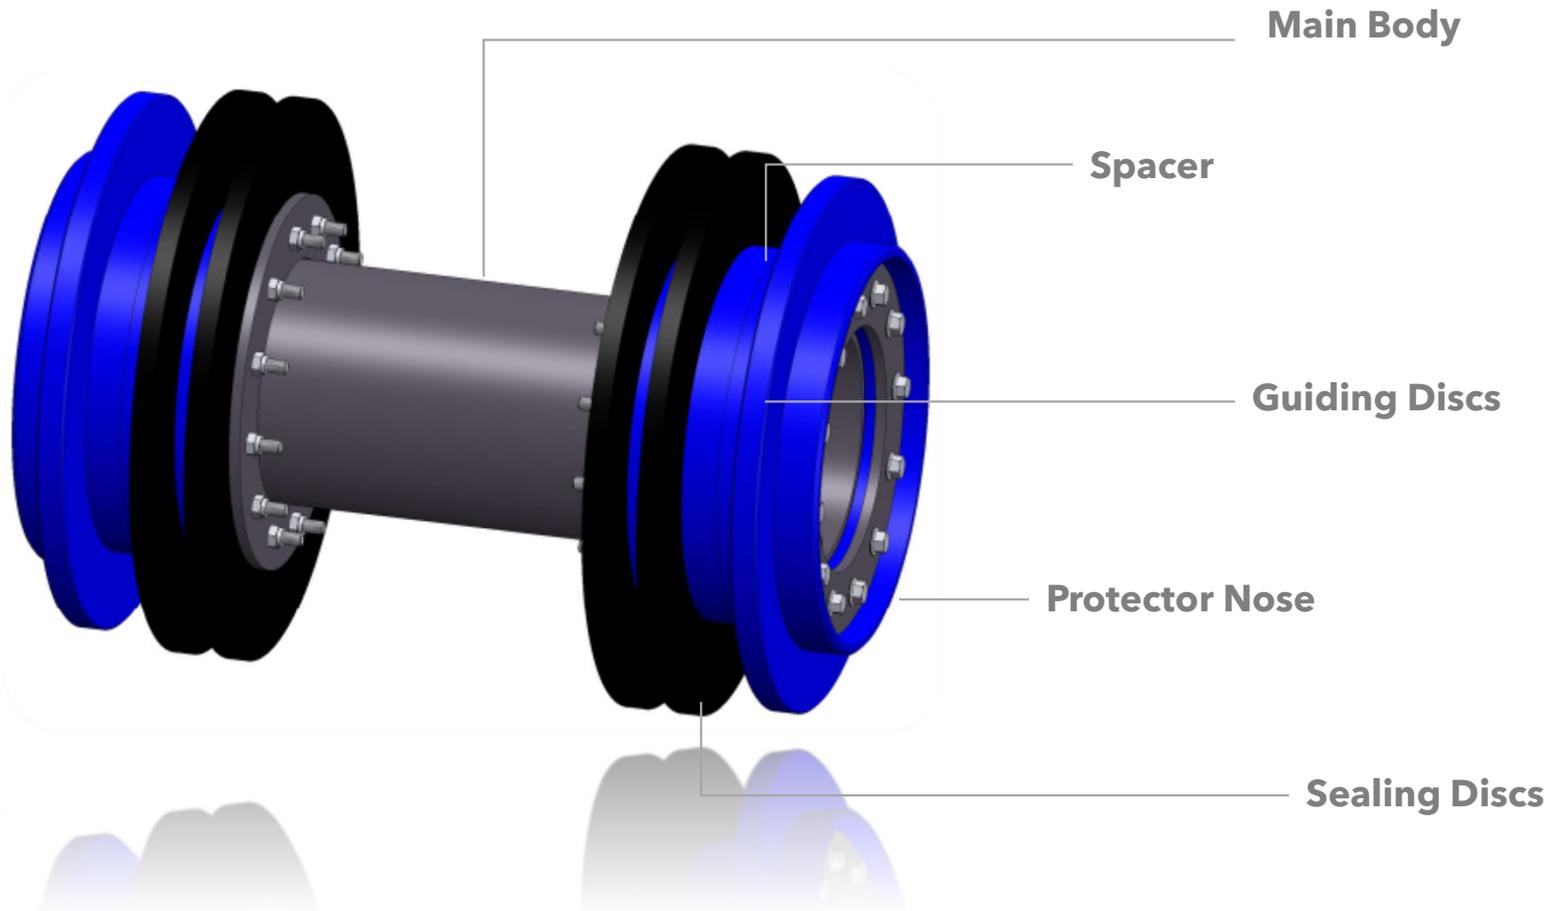

Pipeline Spheres

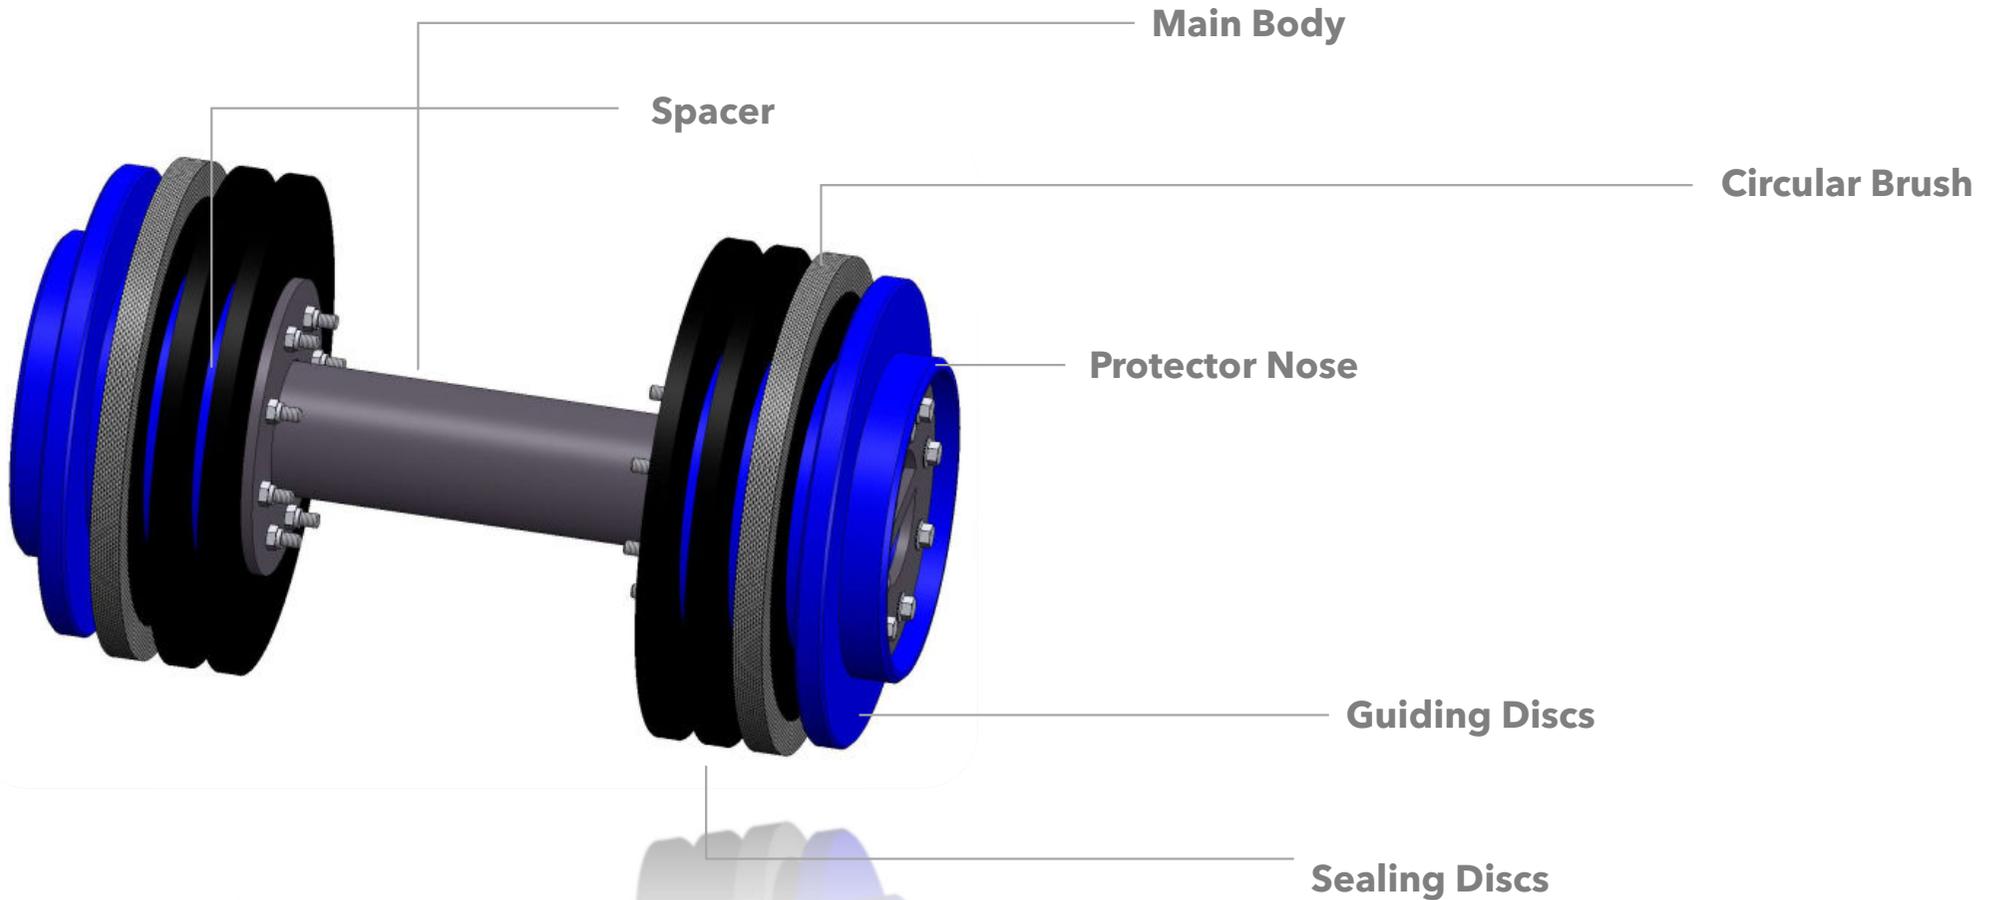

Decoking Pigs

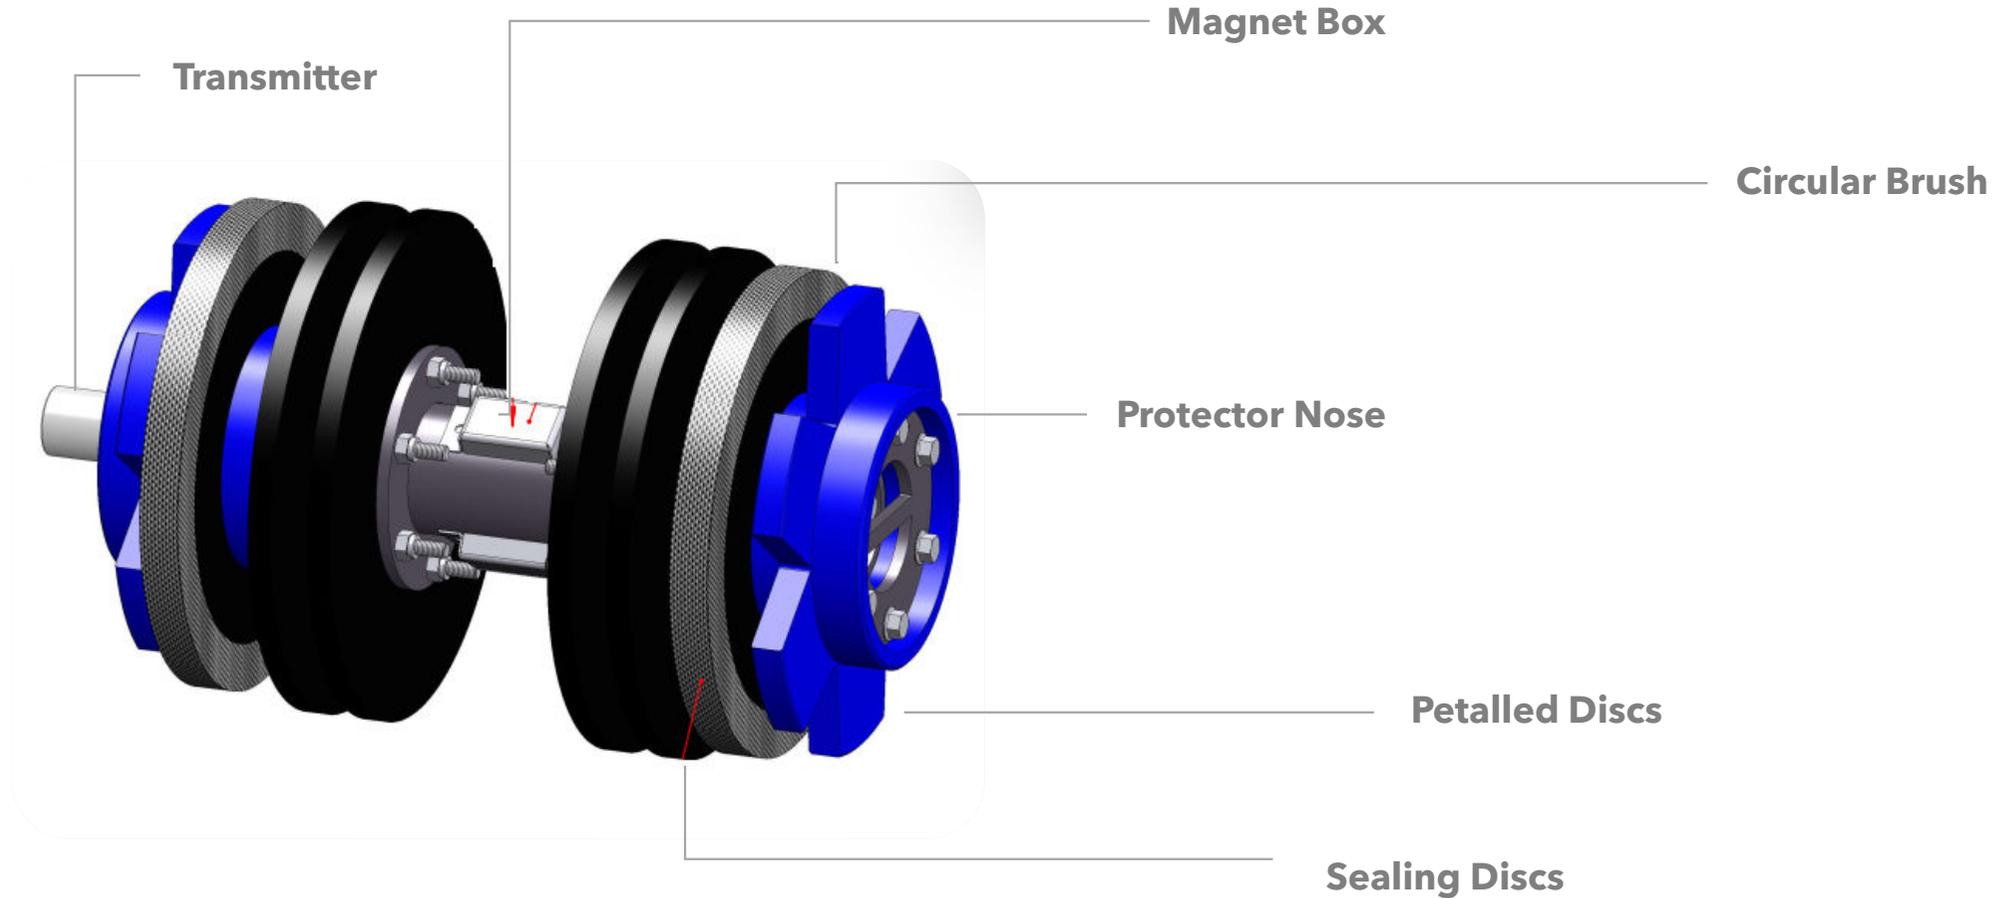

High Pressure Pipeline Test Plugs

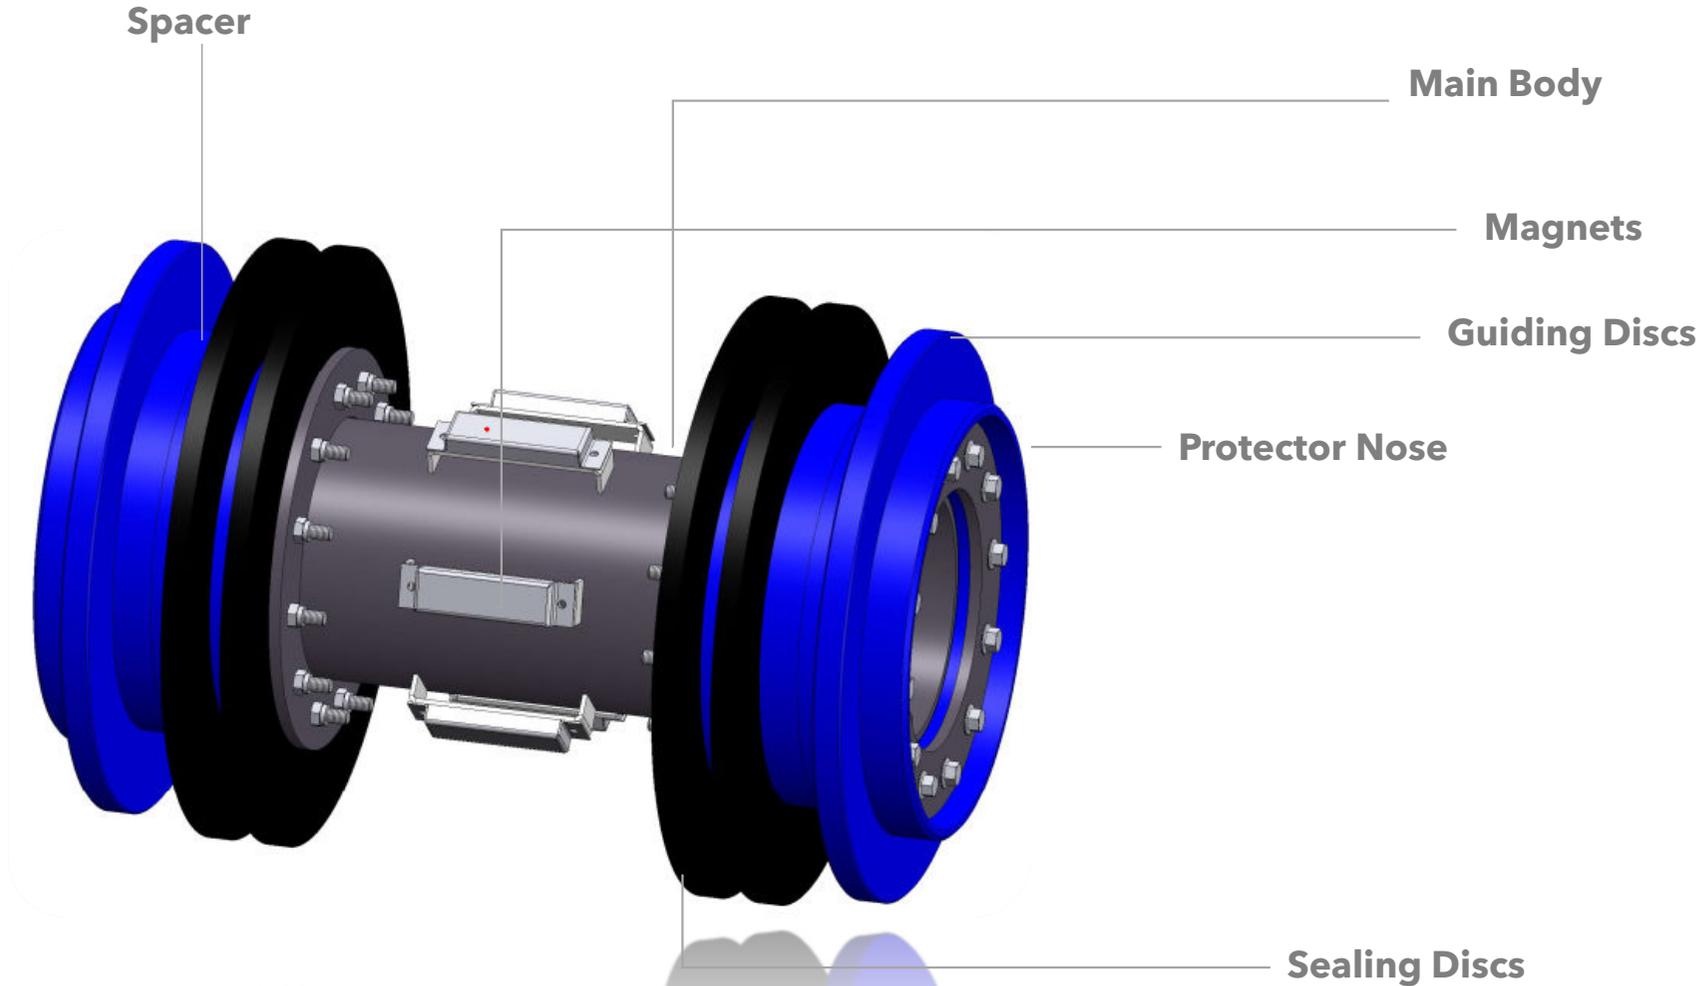

High Friction Isolation Pigs & Dual Pipeline Plugs

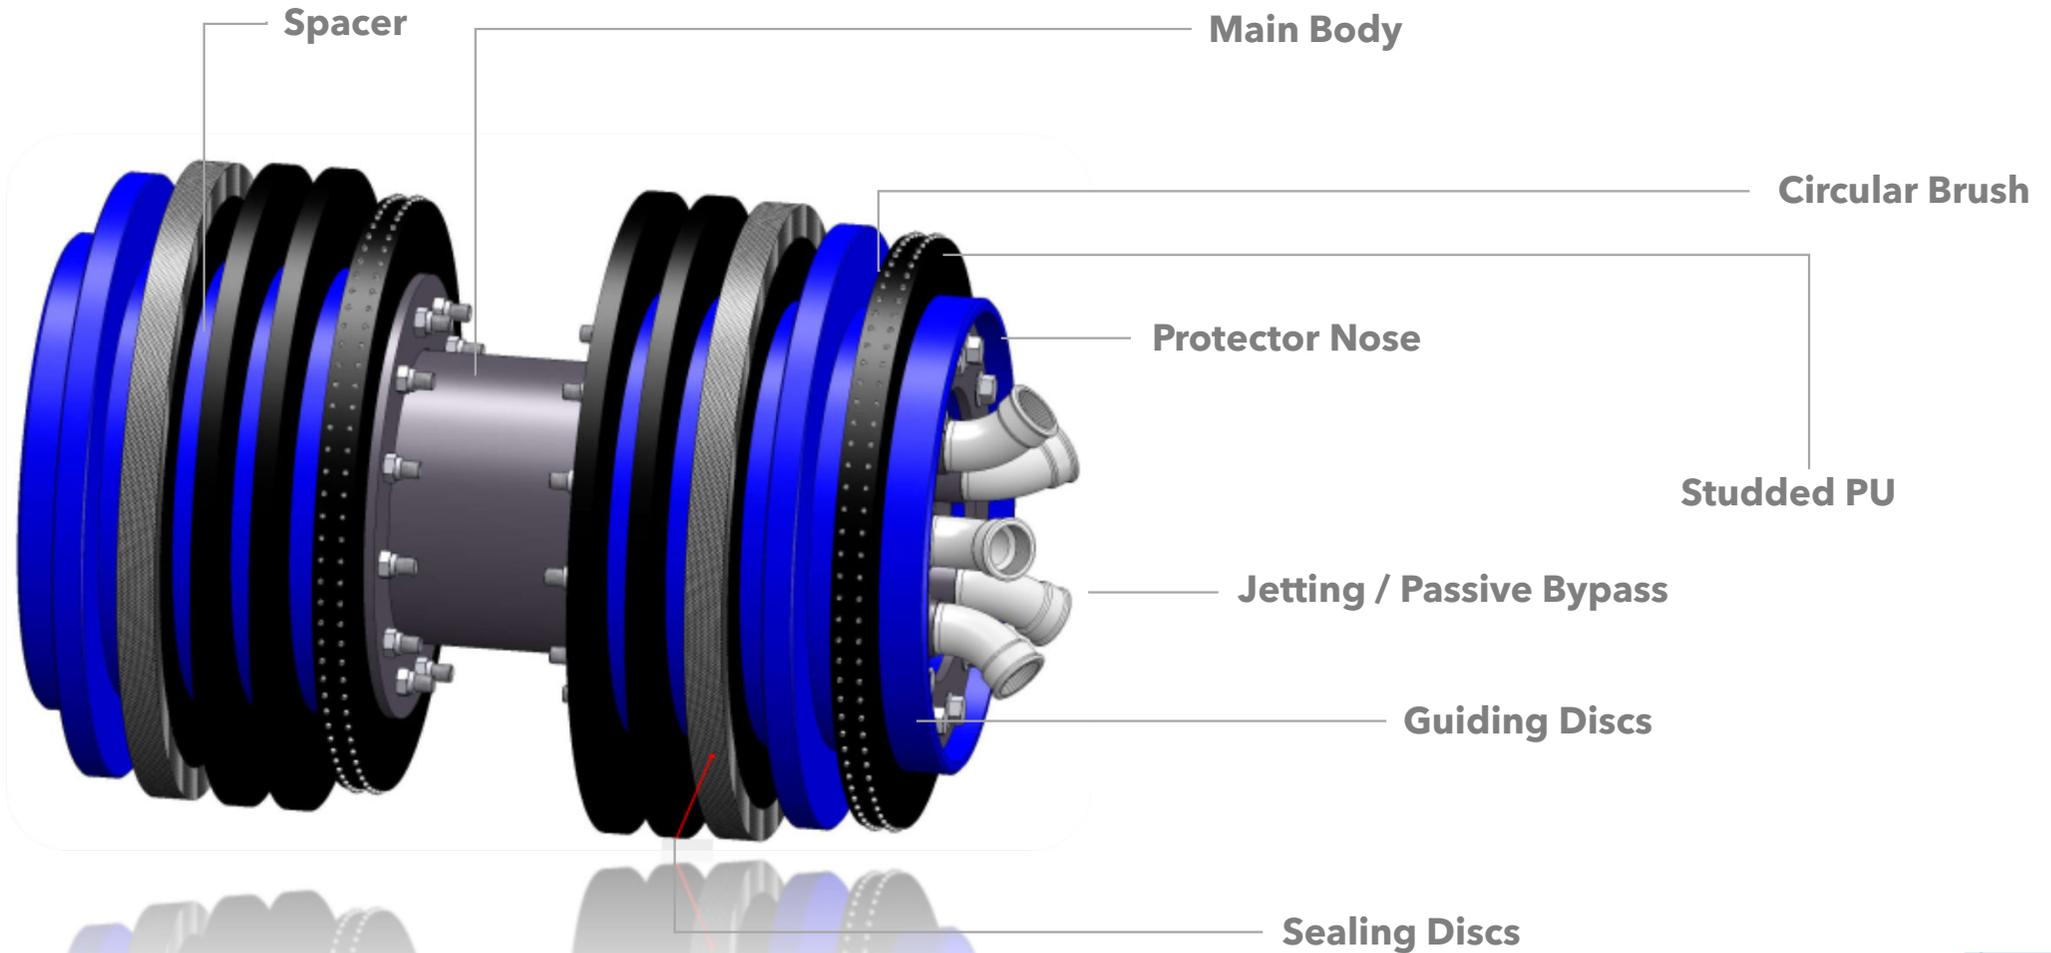

Special pigging program and customize pigs

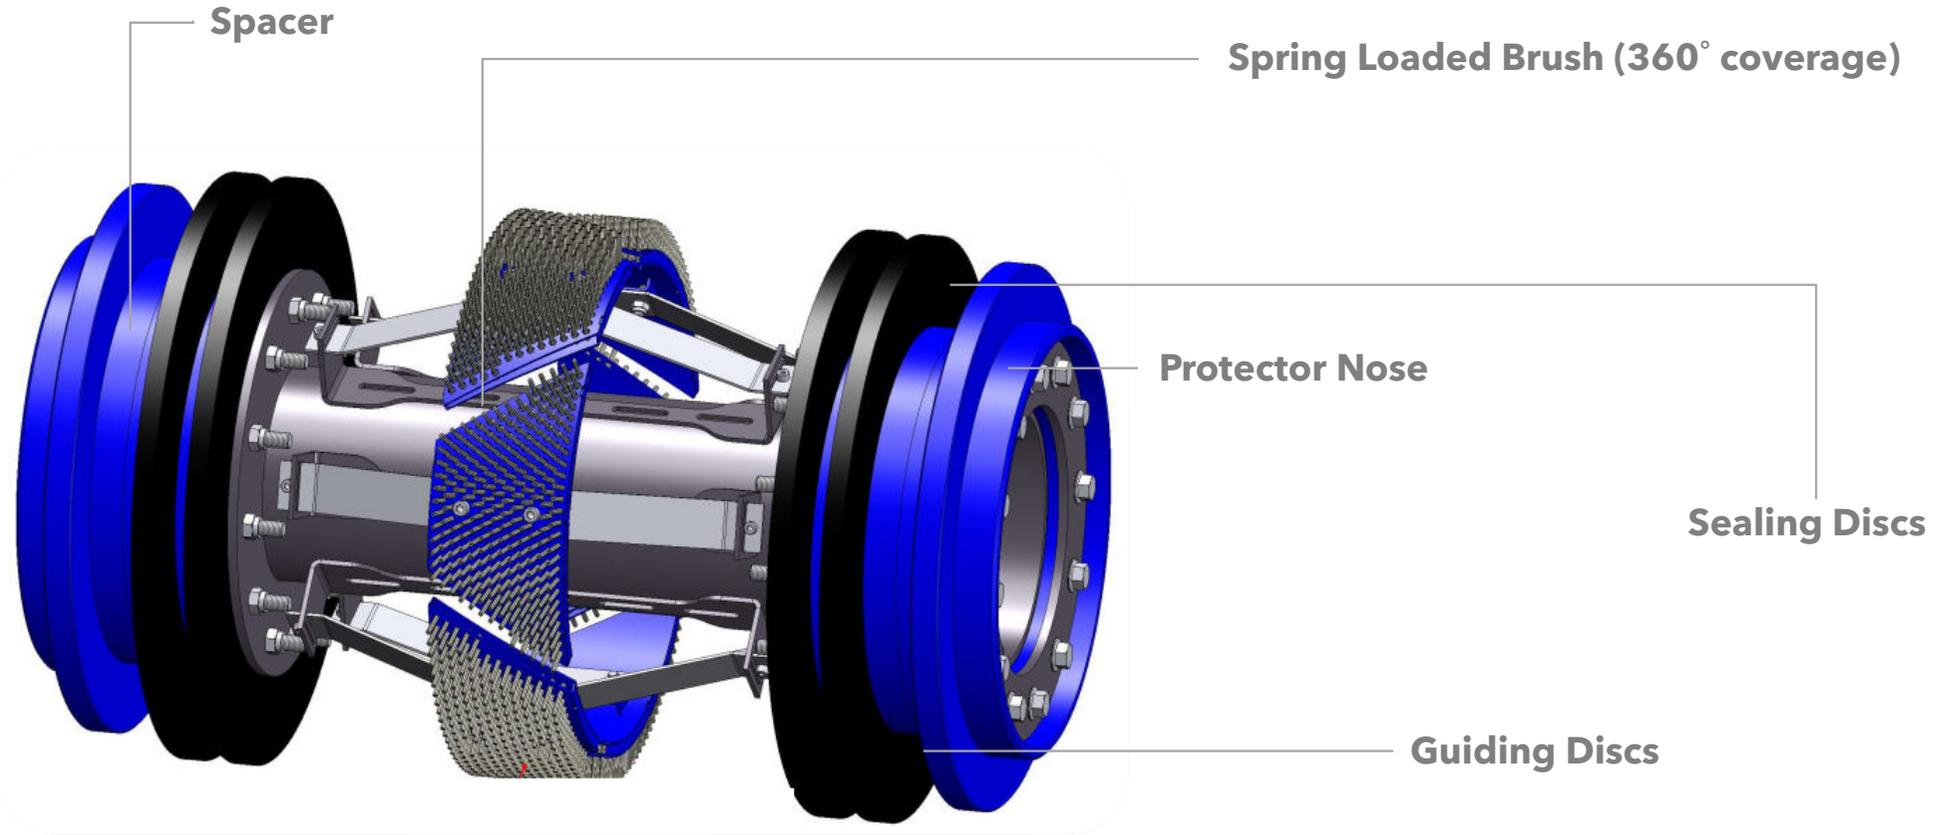

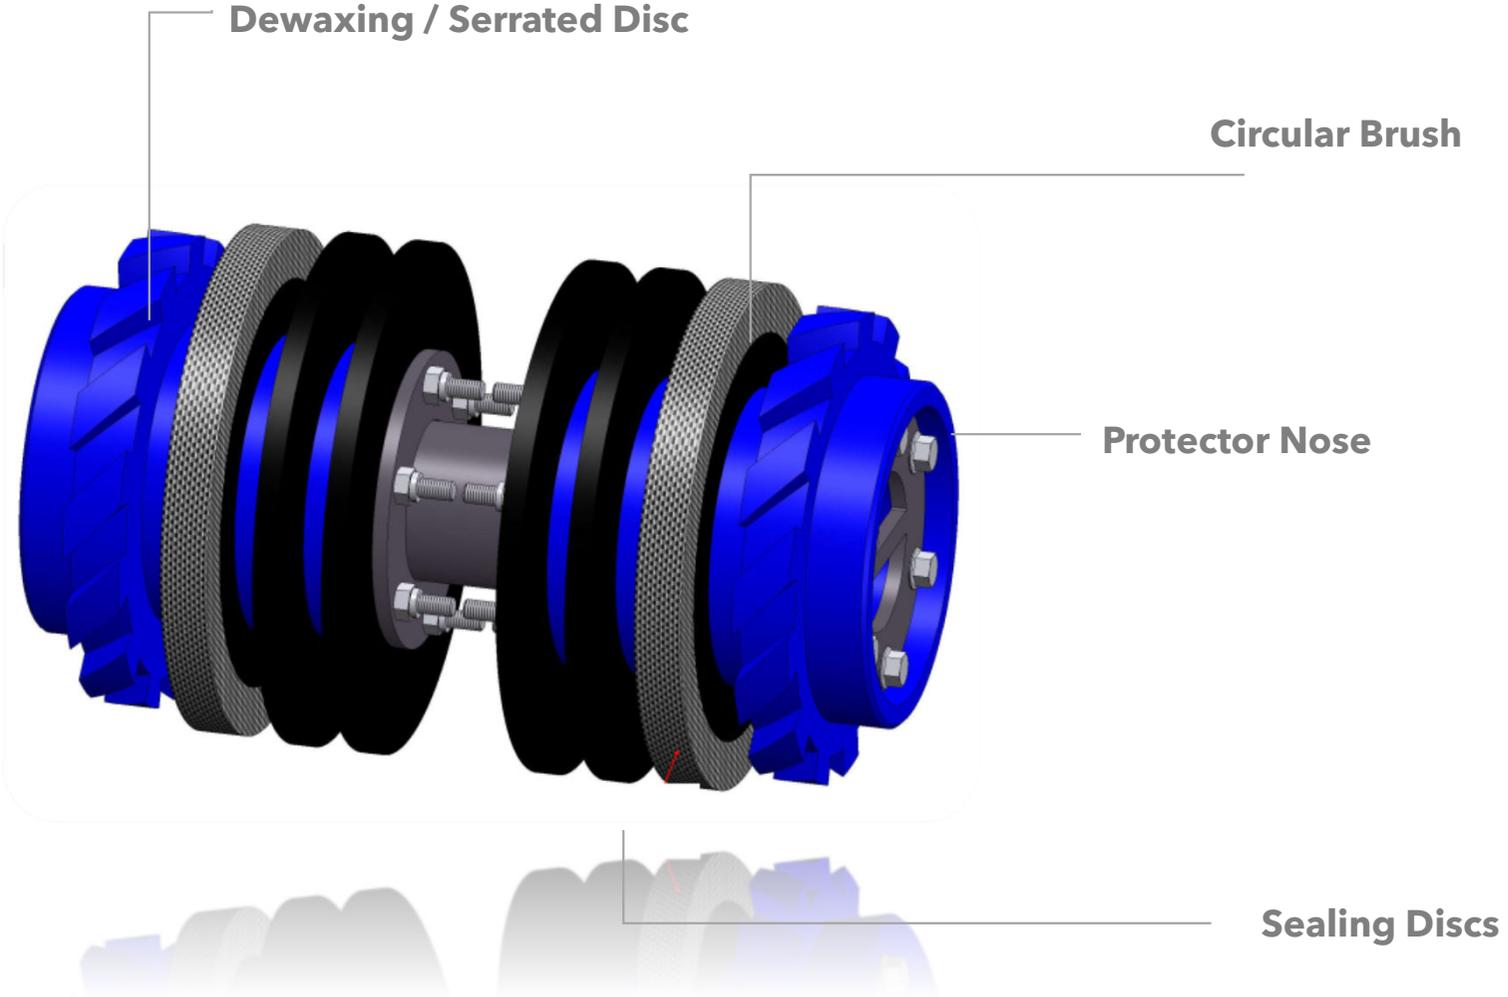

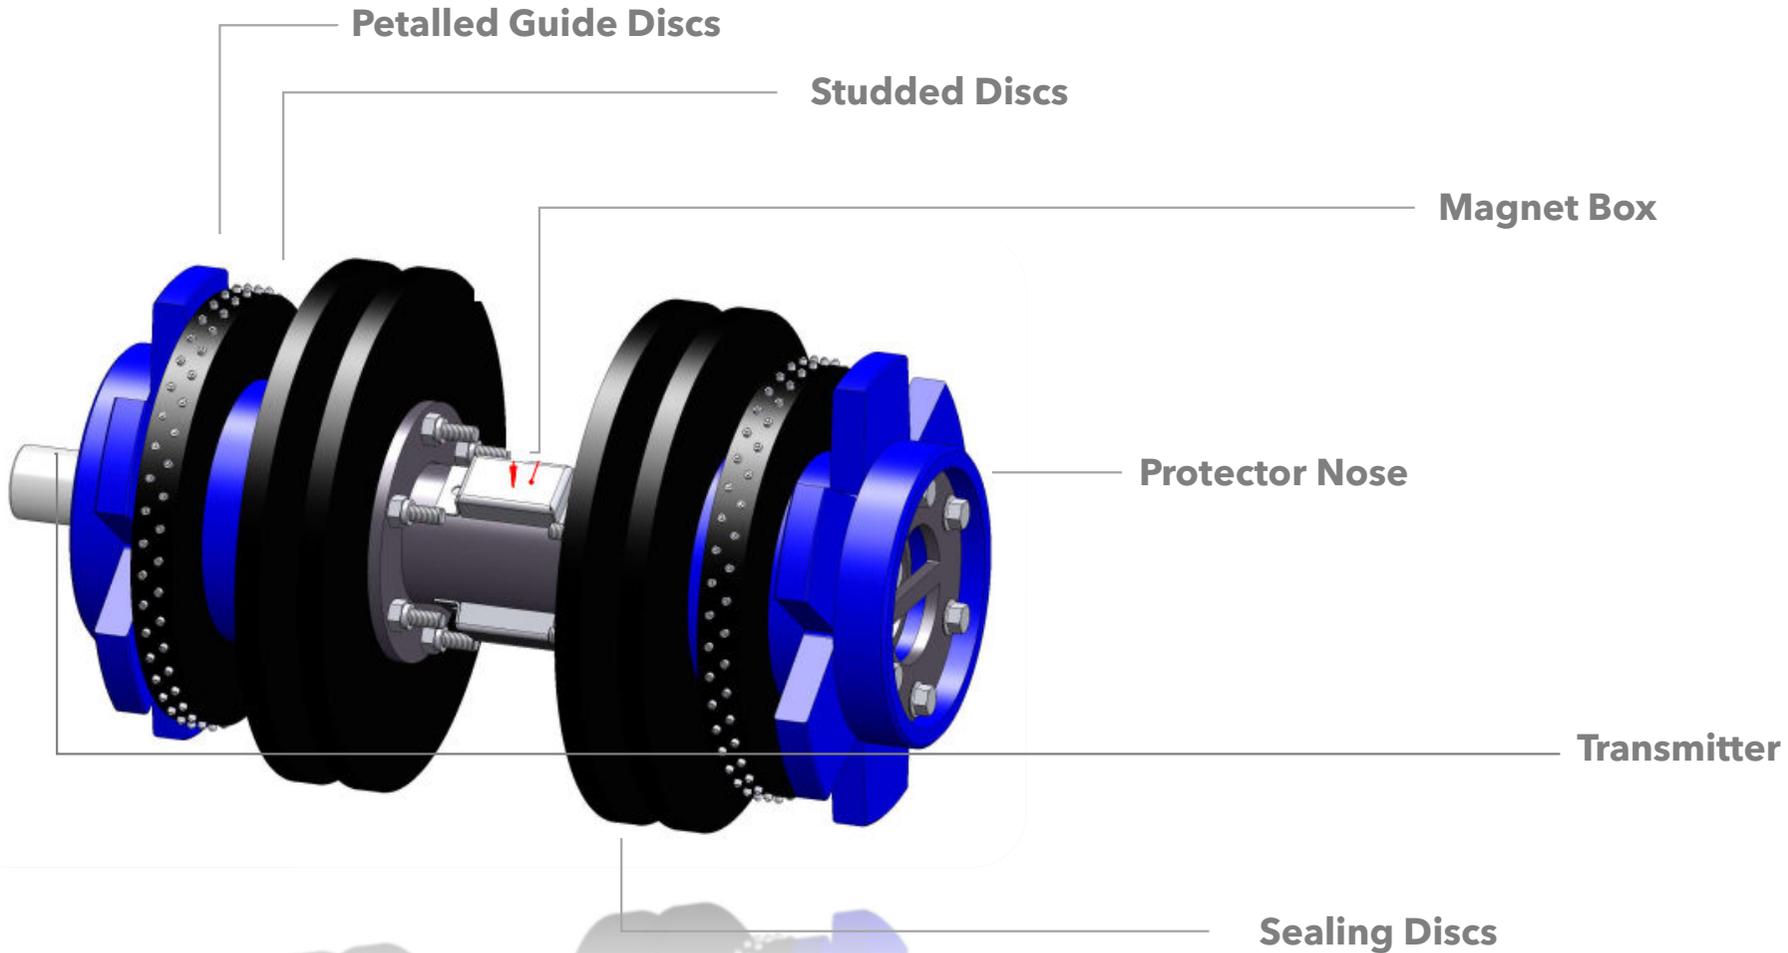

Dewaxing / Serrated Disc

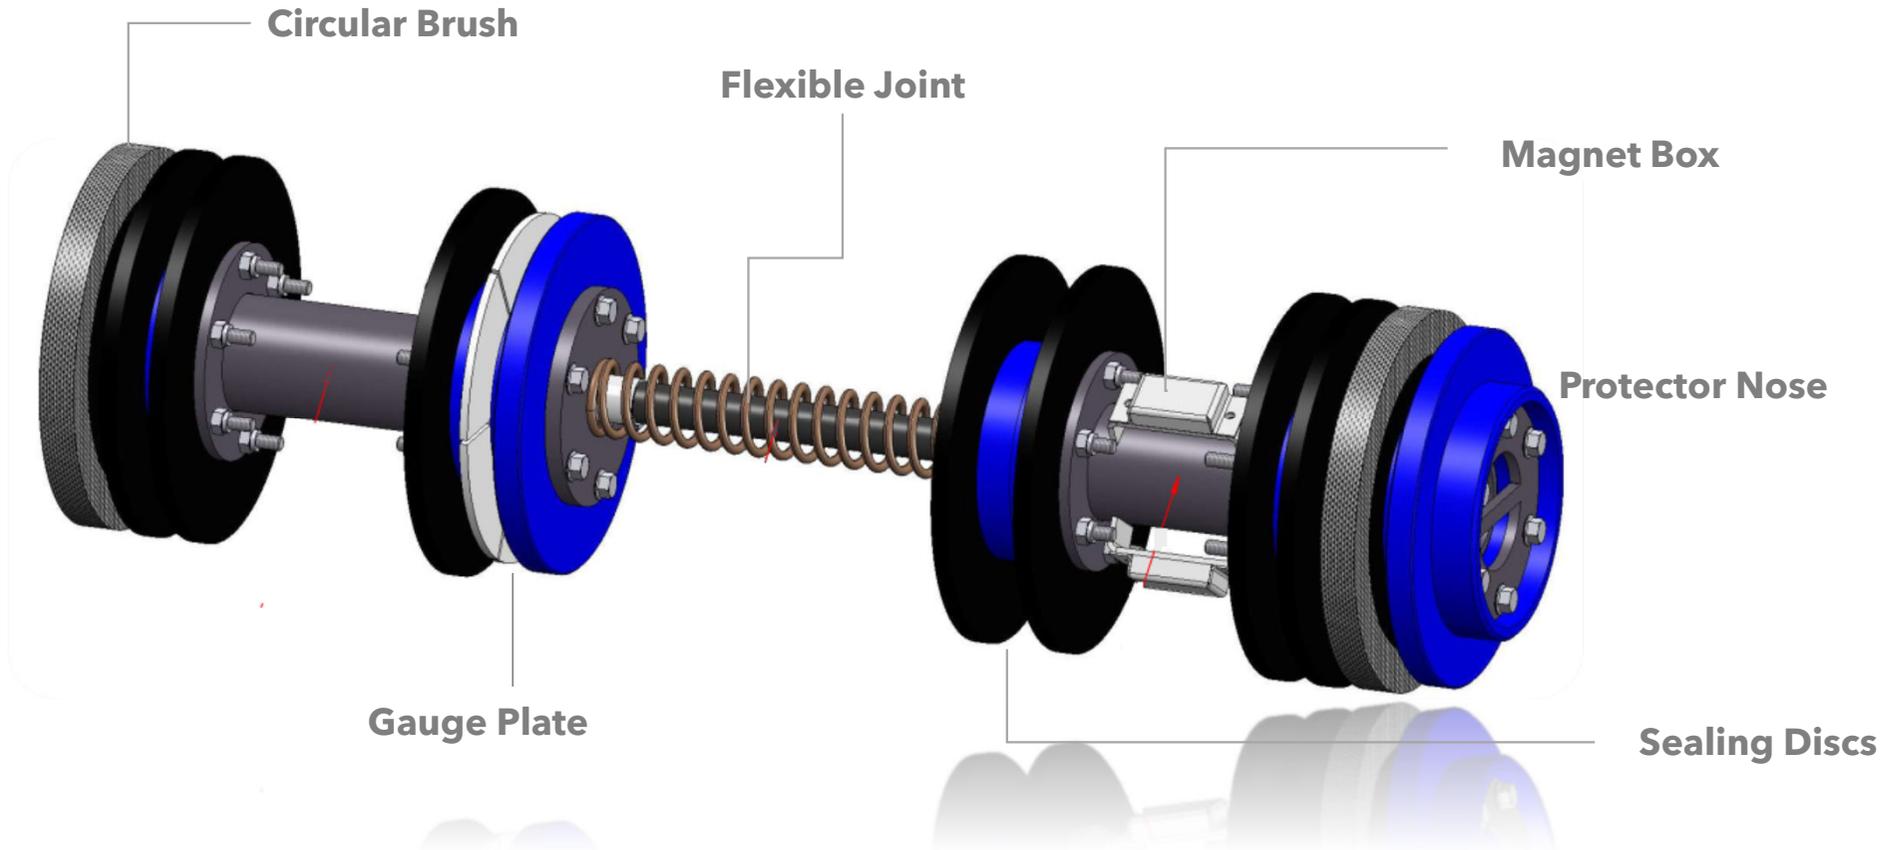

Circular Brush

Protector Nose

Sealing Discs

Extreme Environment Pigs

Fiber sealing

Temperature up to 343 ° C

**Forward reaching
spring steel**

Hook point

Corrosion Pit Cleaning

Fiber sealing

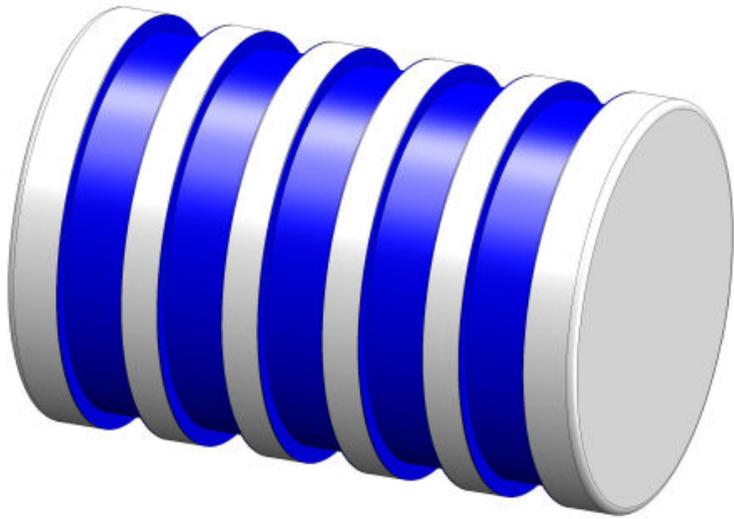

Temperature up to 343 °C

Hook point

**Forward
reaching
spring
steel**

Fiberbuilt Pit Cleaning Pigs have patented technology to yield maximum cleaning performance in corrosion pits. Forward-reaching spring steel wires dig deep into corrosion pits. Removes 80% more volume from corrosion pits than a conventional brush pig.

Foam Discs

HydroFoam Pig

YELLOW SWAB

BLUE BARE

RED BARE

BLUE CRISS-CROSS SILICON CARBIDE

RED CRISS-CROSS SILICON CARBIDE

BLUE CRISS-CROSS WIRE BRUSH

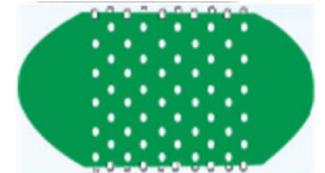

RED CRISS-CROSS WIRE BRUSH

BLUE CRISS-CROSS

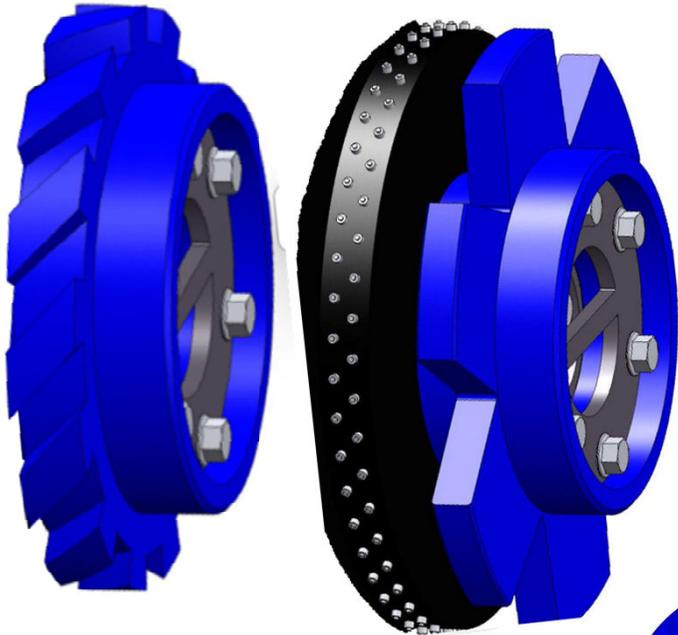

RED CRISS-CROSS

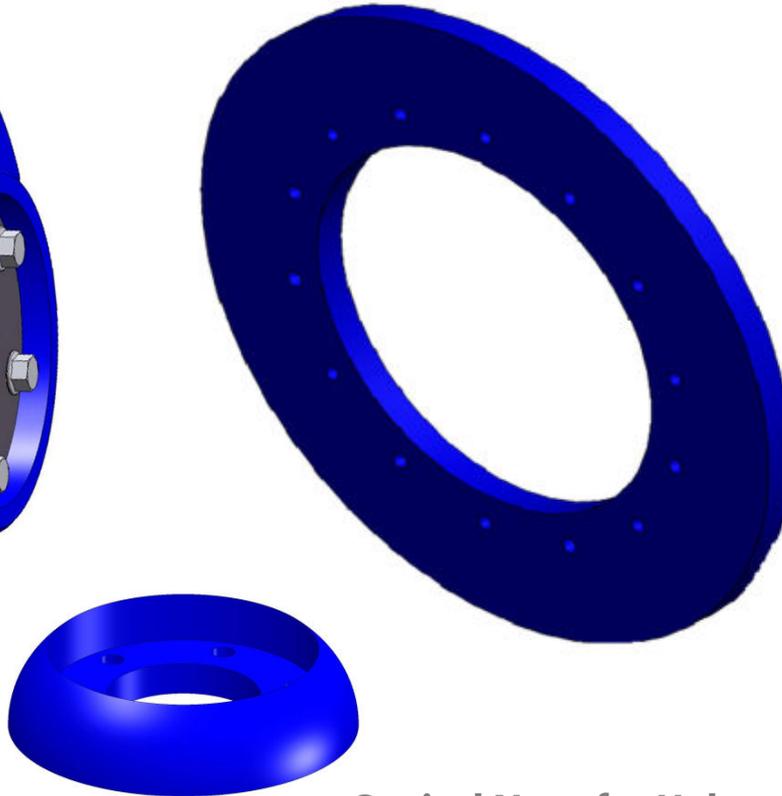

Dewaxing / Serrated Discs

Guiding & Sealing Disc

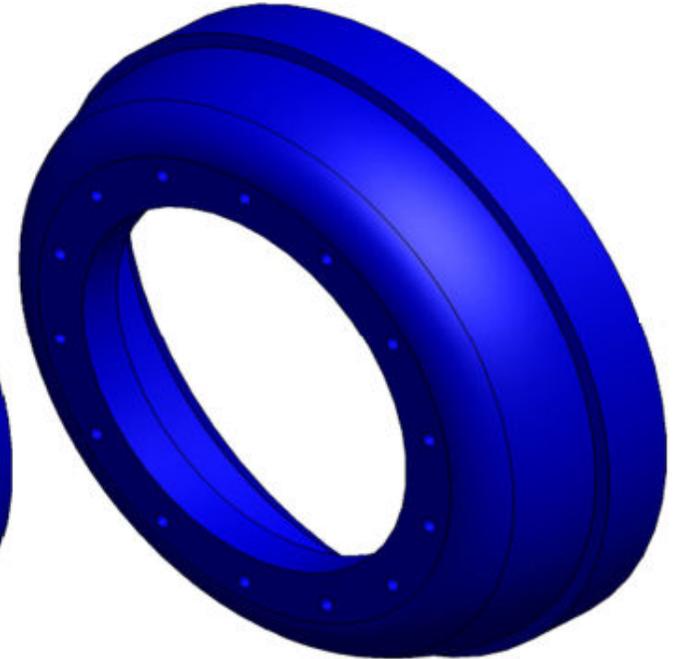

Cup (uni-directional)

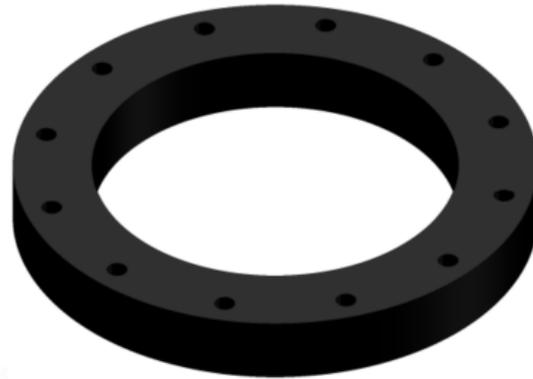

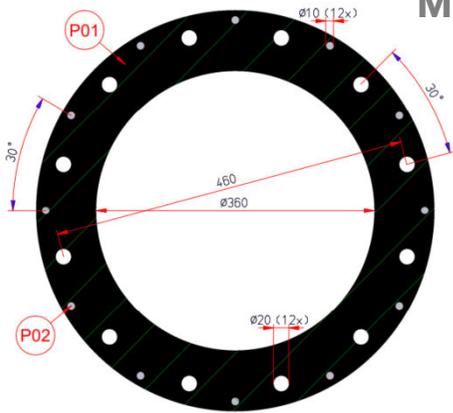

Decaling / Studded Discs

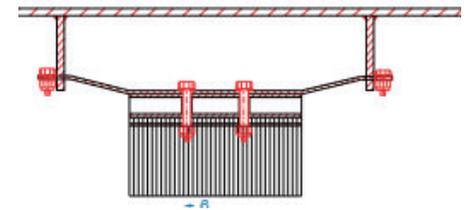

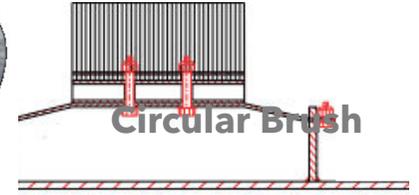

Conical Nose for Unbarred tee

Magnet spacers

Circular Brush

Spring Loaded Brush

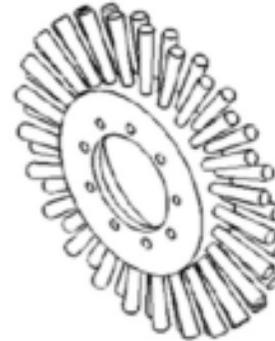

Block Brush (Pencil Type)

Flat Wire Brush

Pencil Brush

Facilities in Netherlands

Cup Pig with Brush & Gauge Pig

Standard Bidi

Dual Module Bi-Di & Foam

Nylon Brushes

POM-C Pigs for flexible risers

FAQ

What is the relationship between Fargo Pipeline and PolyEurope BV?

Fargo Pipeline is a Malaysia-based pipeline services company specializing in pigging solutions. The company collaborates with PolyEurope, a globally recognized pigging tool manufacturer with decades of experience, to deliver reliable and efficient pipeline maintenance services.

How does the collaboration benefit the client?

The collaboration combines Fargo's local expertise with PolyEurope's high quality tools, delivering reliable and effective pipeline solutions for clients

Why are the correct pigging tools and knowledge important for pipeline operations?

Using the right pigging tools and expertise is essential for safe and efficient pipeline operations. **Fargo Pipeline** contributes proven field experience and technical know-how, while **PolyEurope** delivers high-quality pigging tools—together providing clients with reliable and effective solutions.

What sizes of pigs and polyurethane components do you supply?

We supply polyurethane discs and parts in sizes ranging from 3" to 54", and Poly Foam Pigs from 1" up to 100", suitable for various pipeline configurations.

What types of spare parts do you supply?

We supply a wide range of specialized spares, including:
Low-friction guiding discs
Block brushes
Pit cleaning brushes
Gauge plates, magnets, transmitters, and more

Do you provide technical support with your products?

Yes. We provide full **technical assistance**, including:
Pig selection and customization
Cleaning and inspection planning
On-site troubleshooting and support

What is the typical lead time for orders?

Lead times vary based on product type and customization, but most standard components and foam pigs are available within **3-4 weeks (or faster)**. Custom designs may require additional time, which will be communicated upon confirmation.

What foam densities are available for your Poly Foam Pigs?

We offer three standard foam densities:

- **Low Density:** 1.5-2 lbs/ft³
- **Medium Density:** 5-7 lbs/ft³
- **High Density:** 8-10 lbs/ft³

Are your components compatible with all pig brands and models?

Yes. All parts and tools are fully customizable to fit any pig brand, design, or specification, including bi-directional, multi-diameter, and intelligent pigs.

Can you design a pig specifically for my pipeline?

Absolutely. We work with clients to develop **custom pigging tools** tailored to specific requirements such as pipe material, internal condition, product type, and pressure/temperature range.

What cleaning elements can be added to the pigs?

Our pigs can be fitted with:

- Silicon carbide grit
- Nylon bristles
- Brushes (Flat wire / Heavy wire / Spring Loaded / Pencil / Nylon)
- Carbon or stainless-steel wire brushes
- Metal studs for aggressive cleaning

THANK YOU  **PolyEurope**
